

Phillip G. St. Louis, M.D., F.A.C.S.

This accomplished and internationally known, disarmingly down-to-earth neurosurgeon's main areas of interest are brain tumors and complex spinal disorders.

He has practiced Neurosurgery in Orlando since 1983. Married for 30 years, he is the proud father of three accomplished daughters.

He spent three months working in Accra, Ghana, through the Foundation for International Education in Neurosurgery. "I took my family with me," he recalls, "and it was a trip we will never forget." He continues to extend his service by providing neurosurgical care to communities in the Caribbean basin, where access to neurosurgery is less available. "I'm very focused on the quality of patient care," he says.

Locally, Dr. St. Louis is a member of the Rollins College Board of Trustees and is currently part of an effort to enhance their pre-med program.

Dr. St. Louis has impressive credentials. He completed his residency in neurosurgery at the Cleveland Clinic and trained at the Hospital for Sick Children in Toronto, Canada. He is a Fellow of the American College of Surgeons and a member of the American Association of Neurosurgeons and the Congress of Neurosurgeons. He is the current Chairman of the Florida Hospital Department of Neurosurgery.

MISSION STATEMENT:

Our mission is to provide comprehensive neuro-surgical care with service and dignity to our patients and their families. We commit to work closely with our referring colleagues and to maintain relations with all support staff who interact with our patients.
